THE SOUL. Body, mind and soul—
These are the carthly trinity.
Two parts of it are finite;
The other part is infinite.
The body and the mind
Stop in the grave.
The soul goes onward,
Not as man shaped it,
To fit the human body
And the mortal mind,
But as God made it,
So it goes to him
Unchanged.
—W. J. Lampton in New York Sun.

A VERY DANIEL INDEED.

If You Haven't the Money, You Can't Pay, Decided the Policeman.

A policeman accomplished a delicate piece of diplomacy the other afternoon at Cathedral parkway and Columbus avenue. Excavations are in progress there for a new building, and a gang of Italian laborers are doing the work under the eye of a boss of their own nationality. As the writer approached the spot a young Italian laborer was angrily exchanging words with the foreman. He carried his coat on one arm and over the opposite shoulder was slung his shovel, which he removed and shook in the intensity of his gesticulation. Suddenly he saw a policeman near by, and he made a dash for the bluecoat and asked for his assistance.

The officer came along with the Italian, and the two joined the foreman. The policeman, who was an Irishman some 40 years old, wore a magisterial air, looked patronizingly and kindly upon the two Italians, who spoke good English, and then he listened gravely to their tale of woe. The boss had dis-charged the young fellow on the spot, alleging that he did not do his work satisfactorily. The young man wanted his wages up to date. The policeman thought that this was only fair and so told the foreman.

'But I haven't the contractor's money," exclaimed the foreman. him go to the office. His time is there, and he'll get his money.'

The policeman looked as wise as an owl, and then turning to the young Italian he thus delivered judgment: "The best thing you can do is to go to the office and get your money. If he (pointing to the foreman) can discharge you on the spot, you ought to get your money on the spot. But, you see, the foreman hain't got it."

The policeman gave his thumb a jerk toward the street, the young Italian took the hint and with a sorrowful but resigned air started on his mission to the

"I think my view of the justice of the situation was right," said the officer a moment later, "but how could the fellow get his money from a man who didn't have it? Anyhow, I saved a rumpus." So he did .- New York Tribune.

The Sight of Birds.

Birds are commonly credited with an extraordinary range of vision. Circumstances lend aid to the development of the mental factors in their case. The usual distance at which terrestrial species use their eyes is limited by the ground horizon. But in the case of the soaring birds, such as vultures and eagles, the horizon, the natural limit of sight, is enormously extended.

Macgillivray early noted that though birds of prey have orbits of great size—the eyeball of the common buzzard being 11% inches in diameter-they do not, as a rule, soar when seeking their

The eagle when hunting flies low, just as do the sparrow hawk and the henharrier. Yet the vultures and condors, birds which admittedly do soar when seeking food, have been proved to find carrion by sight. A careass was covered with canvas and some offal placed upon it. The vultures saw this, descended and ate it and then sat on the covered portion within a few inches of a putrid carcass. When a hole was made in the covering, they saw and attacked the food below. But the rapid congregation of vultures from a distance to a carcass is probably due to their watching their neighbors, each of which is surveying a limited area. Charles Darwin pointed out that in a level country the height of sky commonly noticed by a mounted man is not more than 15 degrees above the horizon, and a vulture on the wing at the height of between 3,000 and 4,000 feet would probably be two miles distant and invisible. Those which descend rapidly and appear to have come from beyond the range of human sight were perhaps hovering vertically over the hunter when he killed his game. - London Spectator.

The Primitive Gun.

As soon as the forces of the explosive gases developed by the burning of powder became known the old style weapons disappeared, and firearms took their places. The first of the kind was a small gun barrel fastened to a long pole and fired with a slow match. Shot stones, balls of lead, iron bolts and fireballs to set buildings on fire were propelled with this apparatus. Only a short distance could be shot with these primitive guns. The old and clumsy siege machines which threw heavy stones by means of a spring rope were changed into siege guns .- Iron Age.

Poultry and Eggs.

The poultry and egg crop of the Unit-ed States is estimated to be worth \$250,-000,000 annually. Startling as these figures may appear, it seems still more remarkable that, besides the above, we import between 60,000,000 and 100, 000,000 dozen eggs each year.

Unhappiness.

They who have never known prosperity can hardly be said to be unhappy; it is from the remembrance of joys we have lost that the arrows of affliction are pointed.-Emile Zola.

Without a theory it is impossible to know what we say when we speak and what we do when we act .- Boyer Col-

onnces fell at Murcia, in Spain.

BLOOD SPOT IN ITS PULP.

Yae "Mike" Apple Thought to Commem orate a Murder of Long Ago.

A peculiar species of fruit is the "Mike" apple. It has a fair skin, an excellent flavor and is extensively propagated in the vicinity of Norwich, Conn. Each individual apple exhibits somewhere in its pulp a red speck, like a tinge of fresh blood, and thereby hangs a strange legend.

The apple obtains its name from Mi cah Rood, a farmer who lived upon the outlands of the Connecticut town in the eighteenth century. The son of Thomas Rood, one of Norwich's early settlers. Micah tilled his fertile acres with all

the zest of youthful ambition.

But of a sudden his habits changed. He grew idle, restless and intemperate He lost all interest in both work and worship. His cattle were neglected and his neighbors shunned. Some attributed the change to witchcraft. Others hinted at insanity.

Winter wore away, spring returned, and the orchard of Micah Rood burst into blossom. On one tree, it was then observed, the flowers had turned from The superstitious neighbors wondered, especially as Rood seemed drawn to this tree by some resistles: fascination. August came and the red blossoms developed into fruit. When the large yellow apples fell from the branches, each one was found to contain a well defined globule, known thereafter as "the drop of blood."

The freak of the apple tree deepened the mystery of Micah's behavior. Conjecture followed surmise, and soon it was remembered that during the previous fall a foreign peddler had passed through Norwich and had spent the night at Micah Rood's. He had never been seen again. Some one suggested that the young farmer had murdered him for his money and buried the body under the apple tree.

Search was made for the body of the stranger, but in vain. Nor was any trace of his stock found among the possessions of the unhappy Micah. If a load of crime rested upon the conscience of the suspected farmer, it never forced a confession from his lips. His farm drifted gradually to decay, and, too broken down to reclaim it, he wandered about town, disordered in mind and

He died in 1728, but while the blood spotted apple continues to grow his name and history will be perpetuated. -New York Herald.

LI HUNG CHANG CARRIED HER.

China's Viceroy Took Literally an Invitation to Escort a Lady.

Speaking of the first meeting of Li Hung Chang and John W. Fester, on which occasion the Chinese viceroy entertained a woman at dinner for the first time in the person of Mrs. Foster, the Washington Capital vouches for the following story, which is one of the best illustrations of true oriental cour-tesy, combined with the peculiar seriousness and matter of factness of the Chineso mind, ever related:
When she was introduced to the vice-

roy, Mrs. Foster wondered how she was to be taken into the banquet room. Some time before, it seems, Li Hung Chang had been guest of honor at a dinner given by the Russian embassador, and being asked to take the embassador's wife to the dining room, proceeded to comply with a literalness which astonished all the guests. The viceroy is a giant in stature, and the embassador's wife being a small woman, he had no difficulty in picking her up bodily and

carrying her to the table.

Mrs. Foster did not yearn for such honor and called upon her husband's diplomacy to arrange that she should be escorted in a less vigorous manner. Mr. Foster's tact was equal to the occasion, and when the doors were thrown open Li Hung Chang led the way, and Mrs. Foster followed him.

The epigrams of Voltaire, the French philosopher, were often ruthlessly sar-castic and severe. He could, however, exercise tact and gentleness, and as is usually the case with brilliant persons those qualities became him wonderfully well

He met the famous statesman Turgot. and cordially inquired about his health. "It is as you see," replied Turgot, "I am tormented with gout. I can hardly drag my feet about."

"You remind me of the statue of Nebuchadnezzar, M. Turgot." "Yes," assented the invalid sadly,

'you are right, poet, the statue had feet of clay. "And a head of gold," cried Voltaire warmly, "remember that, a head of gold."—Youth's Companion.

Riding Astride.

The new woman is only copying after the ancient dame when she rides astride, as is now the fashion of the royal princesses and the leading equestriennes of both England and America. Joan of Arc rode astride at the head of the French army, and Queen Elizabeth used to ride to falcon hunts in this fashion behind Lord Leicester. It was only in the sixteenth century that the sidesaddle came into use in England, and women rode astride in Germany until the close of the eighteenth century. In most foreign countries the fashion of riding on one side has never been adopted by women. - Chicago Tribune.

Both Are Favorites. "Your story is a little vague at one

point," said the publisher, and the young woman naturally wanted to know the whereabouts of the alleged

Where you say," explained the pub lisher, "that 'she, defeated in argument, had no recourse but to woman' most effective weapons against the tyrant man.' Now, do you refer to tears or flatirons?"-Cincinnati Enquirer.

In 1775 hailstones said to weigh 20 the souls of the righteens are both immortal and divine. -Socrates.

FINANCE AND COMMERCE.

New York Stock Market. New York Stock Market.

New York. Sept. 19.—The volume of trading in stocks to day was larger by fully 100,000 shares than that of Wednosday and the tone of speculation was less feverish. The course of prices also was more uniform. London turned in weak for Americans, but otherwise did not figure in this market. The opening was firm and with the evention of tem.

weak for Americans, but otherwise did not figure in this market. The opening was firm and, with the exception of temporary set backs at 11 and 12 o'clock. the tendency of prices was upward to the close. The strength of the general speculation was most favorably affected by a drop of %c in posted rates, and generally in actual rates of exchange, which were announced in the afternoon. It was inferred that other reductions would be made which might militate against any large outflow of gold this week.

Closing stocks were as follows:

Atchison, 22%; Adams Express, 147%; Baltimore and Ohio, 64%; Chesapeake and Ohio, 20%; Chicago, Burlington and Quincy, 85%; Chicago, Burlington and Quincy, 85%; Chicago, Burlington and Western, 167%; Distillers and Cattle Feeders Co., 20%; Erie, 9; Erie preferred, 22; Great Northern preferred, 104; Lake Shore, 150; Lead Trust, 36%; Louisville and Nashville, 64; National Cordage, 7%; National Cordage preferred, 14%; N. J. Central, 114%; Norfolk and Western preferred, 14%; Northern Pacific preferred, 19%; Northwestern, 103%; Northwestern preferred, 14%; N. Y. Central, 102%; N.Y. and New England, 51; Pacific Maii, 33%; Pullman Paiace, 173%; Reading, 20%; Rock Island, 77%; St. Paul, 75%; St. Paul and Omaha, 42%; Southern 33%; Pullman Paiace, 173¼; Reading, 20%; Rock Island, 77%; St. Paul, 75%; St. Paul and Omaha, 42%; Southern Pacific, 24¼; Sugar Refinery, 108; Union Pacific, 15½; Western Union, 93¼; General Electric, 38%; Southern, 13¼; Southern preferred, 39½; Tobacco, 102%; Tobacco preferred, 107. 102%; Tobacco preferred, 107. IF YOUR hair is coming out Crown Hair Tonic will permanently stop it and prove an elegant dressing for the hair, removing all dandruff and clensing the scalp without irritation. Price 50 cents bottle at Christian-Barbee drug store only.

MRS E. E. DAVIS, of San Miguel, Cal., says: "I am trying in a measure to repay the manufacturers of Chamberlain's Cough Remedy for the great good their remedy has done me. For years I was a constant sufferer from weak lungs and bronchial asthma. My rest at night was disturbed by a hacking cough, so that I felt miserable the greater part of the time. Many remedies recommended by friends were tried, none of which proved suitable to my case. I did not experience any beneficial, results until I began taking Chamberlain's Cough Remedy. After two bottles of the large size have been used I am pleased to state my health is better than it has been for years. The soreness has left my lungs and chest and I can breathe easily. It has done me so much good that I want all who are suffering with lung troubles, as I was, to give it a trial." For sale by the Chas. Lyle Drug Company. the Chas. Lyle Drug Company.
